SUMMARY

Highly motivated BSIT graduate with strong analytical skillset and practical experience in process design and optimization, consistently delivering results-oriented solutions. Advocate with experience providing exceptional support.

PROFESSIONAL EXPERIENCE

Project Manager & System Analysis, Davao del Norte State College **June 2024 - Present**

- During my capstone project, I served as both Project Manager and System Analyst, a dual role that significantly enhanced my understanding of software development's intricacies.
- This experience provided invaluable hands-on learning in both technical and managerial aspects of software development.
- I developed strong communication, problem-solving, and leadership skills, while also solidifying my understanding of system analysis and design principles.

Internship, Wela Online Corporation **March 2024 - June 2024**

- Resolving bugs and optimizing an enrollment system is an ongoing process that requires a multifaceted approach.
- Learn from experienced professionals and gain valuable industry experience.

PROJECTS

Health-I: A CVD Risk Classification and Management System With GIS Mapping **Jan 2023 - Jun 2023**

Davao del Norte State College

- Develop a machine learning-based system for predicting the following cardiovascular event risk levels of an individual
- Perform a Performance metrics analysis to determine the most effective algorithm for predicting individual's risk level of experiencing a cardiovascular disease
